

Using This Diagram

The electrical components of the Lagonda are listed on the reverse side of this broadsheet and used on the terminals of the actual component to which the terminals of the actual component to which cables are connected.

Address code
This is the component and terminal to which the cable is connected.

Cable colour code
This is the colour of the cable as connected.

Interlocks
These are the DIN standard cable colour interlocks:

- B = Blue
- Gr = Green
- Y = Yellow
- W = White
- Bl = Black
- P = Purple
- R = Red
- Or = Orange

Relay types
On the wiring diagram, a number is placed in both the left and right hand columns of the diagram.

After the item number, capital letters A, B or C may appear in brackets. This indicates that the item is one of three types of relay as shown below.

Description
A short statement on what the item is and its function.

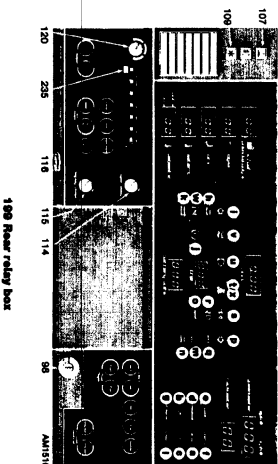

Location
This will show where on the location diagram the item is located. The location diagram is shown on the reverse side of this broadsheet.

Graphic symbol
The symbol consists of an outline representation of the component enclosing a standard symbol. These are based on those used in DIN standards.

Terminal codes
To right hand of the symbol is a terminal code. To left hand of the symbol is a terminal code.

Example 1
Type of Relay: 31 (A) left hand terminal (B) right hand terminal (C) motor relay (D) lamp
